## Education

**Vellore Institute of Technology** — Bhopal, MP
Bachelor of Technology in Computer Science and Engineering; CGPA: 9.03/10 — 2023 - 2027

**St. Theresa School** — Nainital, UK
Class XII (CBSE); Percentage: 89.83% — 2022 - 2023

**St. Theresa School** — Nainital, UK
Class X (CBSE); Percentage: 90.83% — 2020 - 2021

## Technical Skills

- **Languages:** Java, JavaScript, TypeScript, SQL, HTML, CSS
- **Concepts:** Data Structures, Algorithms, OOP, REST APIs, MVC Architecture
- **Frameworks & Libraries:** Express.js, React.js, Mongoose
- **Databases:** MongoDB, MySQL
- **Tools & Technologies:** Git, GitHub, Postman, Docker

## Projects

**HireVaani — Multilingual Assessment Platform**

- Developed a full-stack voice-based screening platform using React.js frontend and Node.js with Express.js backend, supporting multilingual interviews in Kannada, Hindi, and English.
- Designed RESTful API with 15+ endpoints implementing JWT-based authentication, role-based access control, and rate limiting for secure candidate screening.
- Integrated third-party AI services (Sarvam AI STT, Google Gemini API, MediaPipe) into backend pipeline with error handling and retry mechanisms.
- Implemented real-time WebSocket connections for live transcript streaming and proctoring alerts, reducing interview latency by 40%.
- Built admin dashboard with real-time analytics using Chart.js, visualizing candidate performance across 5 evaluation dimensions.

**Life Cost — Cost of Living Analytics Platform**

- Built a full-stack web application using React.js frontend and Node.js with Express.js backend, delivering cost of living analytics for Madhya Pradesh.
- Engineered REST API endpoints for rent prediction, metro fare classification, locality recommendations, and grocery cost estimation using JavaScript.
- Integrated Chart.js for interactive inflation trend visualizations and implemented dynamic locality recommendations.
- Designed responsive UI using HTML5, CSS3, and Tailwind CSS with modular component architecture achieving 95% code reusability.
- Implemented asynchronous API calls with loading states and error boundaries, with browser localStorage for response caching.
- Containerized the application using Docker Compose, orchestrating Node.js backend, React frontend, and MySQL database services.

## Co-Curricular Activities

**Secretary**
AWS Cloud Club

- Led club operations and partnered with AWS representatives to deliver monthly cloud-computing workshops to 50+ participants.

**Event Lead**
Bashcraft Club

- Directed planning and execution of 4 technical events, coordinating 10+ speakers and sponsors, resulting in 200+ attendee registrations.

## Achievements

- Solved 200+ problems on LeetCode, demonstrating strong problem-solving and algorithmic skills.
